Ms Uma Bhargav, 70 years female

Keyhole Endoscopic Discectomy under Local Anesthesia

This pain in my leg started with a sudden surprise one morning when I was not able to take a step down from the bed. I tried with great courage to walk. I did do my daily chores much against my physical being.

As soon as I mentioned to my son, the first name, which came to his memory was Dr Bhanot, who had treated him for slipped disc in the past. I came to him, he saw me and found that I had a slipped disc and recommended some medicine and exercises. I went for a short walk where my legs became limbo and I fell down. From that day onwards, the pain became excruciating. I tried to test my will power but it was impossible. I came to Dr Bhanot again and he said now there was no other remedy but a surgery. I came to the hospital with all the trust and faith in him and I underwent this surgery yesterday on the 23rd July 2014.

With his personal attitude of empathy and compassion, he put me to total rest with all my doubts. His team showed the faith in the leader and his professional ability does not show any lacking, only excellence. Today, I go back home, reposing confidence and courage and ability in my limbs. God bless the team.
